Projects

Minor Project – I : Doctor Appointment System 　　　**Aug 2021-Dec 2021**

• We created a system to take appointments from the doctor from total scratch. We used pure
Java and Data Structures for this

Personal Project : Noshh
• Noshh removes all the silent parts in a youtube video and plays it for you which can
save a lot of time for students who studies from lectures as it removes the silence even
between the speech.

Personal Project : Class Automation
• Class Automation automatically attends the classes that a user scheduler for the day
on Blackboard. It uses Selenium to Web Scrape the Black Board website and attends
the scheduled accordingly.

Accomplishment And Recognition

1)**Runner Up** at Gauntlet Affair, a code solving competition.
2)Freelanced as a Video Editor
3)Under an organization we could provide food to the people affected by
Covid-19. We have served more than 1150+ meals as well as helping out 5
villages in the Burnpur region of West Bengal.
4)Part of two Dance Crew in college and has represented the college and
my crew various times on stage
